# ISO20000<sup>®</sup> AT A GLANCE

## ISO/IEC 20000-1:2011 (PART 1)

**Part 1** is the formal specification and defines the requirements for a service management system.

**The scope includes:**

- General requirements for a service management system
- Design and transition of new or changed services
- Service delivery process
- Relationship processes
- Resolution processes
- Control processes

## ISO/IEC 20000-2:2012 (PART 2)

**Part 2** Enables organizations and individuals to interpret ISO/IEC 20000-1 more accurately, and therefore to use it more effectively.

The guidance includes examples and suggestions to enable organizations to interpret and apply ISO/IEC 20000-1, including references to other parts of ISO/IEC 20000 and other relevant standards.

## ISO/IEC TR 20000-3:2012 (PART 3)

**Part 3** is useful for service providers, consultants and assessors. It includes practical guidance on scope definition, applicability and demonstration of conformity to the requirements in ISO/IEC 20000-1. Guidance on the different types of conformity assessment and assessment standards is included.

ISO/IEC 20000-3:2012 will assist in establishing if ISO/IEC 20000-1 is applicable to a service provider's circumstances.

## ISO/IEC 20000-1:2011 (PART 4)

**Part 4** facilitates the development of a process assessment model according to ISO/IEC 15504 process assessment principles. The process reference model specified in ISO/IEC TR 20000-4:2010 describes at an abstract level the processes including the general service management system processes implied by ISO/IEC 20000-1. The purpose and outcomes described in ISO/IEC TR 20000-4:2010 are, however, considered to be the minimum necessary to meet ISO/IEC 20000-1 requirements. The process reference model does not provide the evidence required by ISO/IEC 20000-1. The process reference model does not specify the interfaces between the processes.

## ISO/IEC TR 20000-5:2013 (PART 5)

**Part 5** is an exemplar implementation plan providing guidance on how to implement a service management system (SMS) to fulfil the requirements of ISO/IEC 20000-1:2011.

The intended users of ISO/IEC TR 20000-5:2013 are service providers, but it can also be useful for those advising service providers on how to implement an SMS.

ISO/IEC TR 20000-5:2013 includes advice for service providers on a suitable order in which to plan, implement and improve an SMS using, as an example, a generic three-phased approach to manage the implementation.

## ISO/IEC 20000-2:2012 (PART 2)

**Part 6** can be used by any organization or individual involved in the planning, design, transition, delivery and improvement of services using ISO/IEC 20000.

### More specifically, it:

- defines the terms used in ISO/IEC 20000;
- promotes cohesion between the parts of ISO/IEC 20000 by explaining the concepts and terminology used across all parts;
- contributes to the understanding of ISO/IEC 20000 by clarifying the relationships between all the parts;
- clarifies the possible interfaces and integration between the service provider's SMS and other management systems;
- provides an overview of other International Standards which can be used in combination with ISO/IEC 20000;
- identifies common areas between ISO/IEC 20000-1 and other International Standards.

ISO/IEC TR 20000-10:2013 describes the core concepts of ISO/IEC 20000, identifying how the different parts interact to support ISO/IEC 20000-1:2011. It also describes the relationships between ISO/IEC 20000 and other International Standards and Technical Reports. ISO/IEC TR 20000-10:2013 also explains the terminology used in ISO/IEC 20000, so that organizations and individuals can interpret the concepts correctly.

*Part 6 is not included in the ISO 20000 training, as it is an explanation of terms and facilitates the understanding of the information in the rest of the standard.*
